SUMMARY

With 10+ years of experience in software product development, I have built and managed software products and engineering teams.

My core skills lies in building scalable application architecture, enhancing engineering processes, developer hiring and optimising cloud infrastructure.

KEY SKILLS

Engineering Management

System Design & Architecture

Sprint Planning and Execution

Node.js (with Express)

AWS Management

MongoDB – Design & Maintenance

EDUCATION

B.Tech, Information Technology
Sikkim Manipal University
2009-2013

TECHNOLOGIES

JavaScript, Node.js, MongoDB, MySQL, Neo4j, FluentD, AWS, ReactJs, React-Native, PHP, Python, Elasticsearch

WORK EXPERIENCES

VP Engineering, DaMENSCH Apparel Pvt. Ltd.

August 2021 – March 2023

Tech-Stack: Node.js, MongoDB, MySQL, PHP, Redis, Docker, Kubernetes, AWS, PHP, ReactJs, React-Native.

DaMENSCH is India's leading online D2C apparel brand. The organization does a revenue of more than \$20M from its website, I joined the team to upgrade the in-house technology implementation and was responsible for building, and managing the tech team, and setting up the end-to-end technology process.

Key Responsibilities:

- ✓ Evaluating – Build vs Buy
- ✓ Product Discussion & Sprint Estimation, Planning, and Release Management.
- ✓ Architecture Review, Design and Discussions.
- ✓ Actively coding for fix production issues.
- ✓ Team – Hiring, and Appraisals

Engineering Manager, Toppr Technologies (now Byju's)

August 2020 – August 2021

Tech-Stack: Node.js, MongoDB, Redis, AWS, ReactJs.

Toppr is listed among the top 10 EduTech companies in Asia, now acquired by BYJU's which is among the top EduTech companies in the world. At Toppr, I managed end-to-end technology implementations for Toppr School platform, a SaaS application given to schools to conduct online classes, quizzes, and exams.

Key Responsibilities:

- ✓ Sprint Estimation, Planning, and Release Management.
- ✓ Architecture Design, Discussions and Code Review.
- ✓ Actively coding for tech backlogs and production issues.

Co-Founder & CTO, Xwards Advertisements

May 2018 – July 2020

Tech-Stack: Node.js, FleuntD, MongoDB, MySQL, Neo4J, React-Native

Xwards was a mobility advertisement start-up responsible for putting digital screens inside taxis, and running advertisements intelligently based on passenger's playlist.

Major Technical Challenges:

- Managing no-buffering on contents for seamless experience.
- Real-time intelligence for pushing Ads based on logs from device.
- Syncing logs of user activities while the device is in offline mode.
- Building system to stop device theft.

Sr. Software Engineer, Justdial Labs

April 2016 – April 2018

Tech-Stack: JavaScript, Fluentd, Elasticsearch

Software Engineer, Tata Consultancy Services

July 2013 – April 2016

Tech-Stack: PHP, MySQL, JavaScript, HTML, CSS
